Knowledge Management

## ReservoirKB<sup>SM</sup> North Sea Knowledge Base Give your decisions a backbone

**You only have to search once.** An all-inclusive source for North Sea oil and gas reserves information, *ReservoirKB North Sea* locates pertinent data needed to benchmark your subsurface studies and gain insight into any new North Sea oil and gas prospects and brown field revitalization projects.

*ReservoirKB North Sea* covers all productive formations discovered, including reservoirs currently either in production or sanctioned for development. Additionally, we provide continually updated reservoir performance metrics, analogs, lessons learned, and regional knowledge. The knowledge base provides a unique combination of reservoir engineering data, geological description, and production data analysis **not available from any other single source.**

### Features

The latest release covers the following areas:

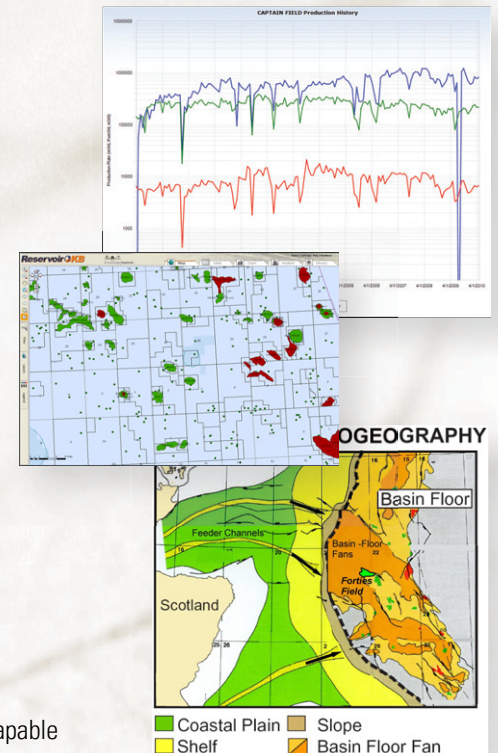

- **UK North Sea**
  - Approximately 230 oil and 100 gas fields
  - Over 2,900 oil and 1200 gas wells
- **UK Onshore**
  - All oil (29) and gas fields (7)
  - All oil (257) and gas wells (12)
- **Norway**
  - Over 85 oil and gas fields
  - Over 3,800 wells
  - Over 600 formations (within approximately 400 lithology groups)
  - Approximately 300 cores
- **Denmark**
  - 22 fields
  - 832 wells

Design and regular database updates make it the most capable knowledge base on the market.

- GIS interface
- Define and export tables of data
- Charts that are easily customized and exported
- Define and export statistics in multiple formats

*ReservoirKB North Sea* is **the most comprehensive knowledge base** directed towards North Sea exploration and appraisal engineers and geoscientists.
